

MOUNTAIN PINE PRESSURE TREATING SUPERFUND SITE

Plainview, Yell County, Arkansas

EPA Region 6

EPA ID# ADR049658628

State Congressional District 02

Updated: July 2004

SITE DESCRIPTION

Size and Location:

The site located on a 95 acres tract of property of which approximately 15 acres are abandoned Wood treatment facilities and comprises the Mt. Pine Pressure Treating Superfund Site. Approximately 45 acres of this tract is timberland and the remainder is grassland. The property is bordered on the north by State Highway 28, on the east by the town of Plainview, Arkansas on the south by grass and woodlands, and on the west by Sunlight Bay Road. The geographical coordinates of the site are 34° 59' 00" North latitude and 93° 18' 12" West longitude.

Setting and History:

The Mountain Pine Pressure Treating (MPPT) Site is two separate, inactive abandoned wood pressure treating facilities: The MPPT plant and the chromate copper and arsenic (CCA) plant which operated from March 1962 until about February 1986. Plainview Lumber Co. is stated to have operated from 1965 to 1986; the facility re-opened briefly during the summer of 1989 but operational conflicts brought about closure. The Site includes both inactive wood preserving facilities where structural timbers were pressure-treated with solutions of pentachlorophenol (PCP) at the MPPT plant, and chromate copper and arsenic at the CCA plant.

Population: Plainview = 685, Yell County = 17,601.

WASTES AND VOLUMES

- The EPA conducted a Removal Action to alleviate liquid and sludge releases from a Recovery Holding Pond (RHP) beginning December 11, 1987. The sludge Removal Action activities contained approximately 2,500 cubic yards of sludge mixing with solidification additives beneath a 2-foot cap which was constructed by EPA during February 25th to 29th, 1988.

SITE ASSESSMENT AND RANKING

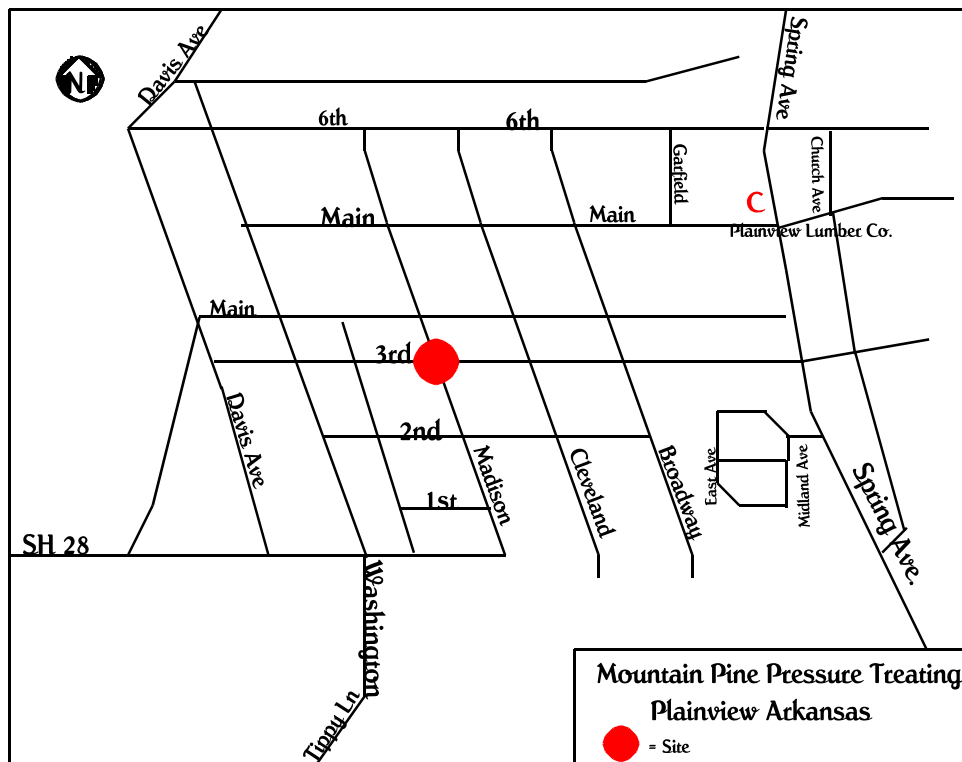

NPL LISTING HISTORY

HRS Score : 50.00

Proposed Date: 4/23/99

Final Date: 7/22/99

SITE MAP AND DIAGRAM

PRESENT STATUS AND SCHEDULES

- A Federal Lead - Response Action Contract (RAC) was issued to CH2M HILL for conducting the site Remedial Investigation/ Feasibility Study (RI/FS). Activities began in December 1998 under Work Assignment No. 039- RICO-06H6. Site deliverables documents by CH2M HILL are as follows:
 - (1) Human Health Risk Assessment (Completed)
 - (2) Ecological Risk Assessment (Completed)
 - (3) The Remedial Investigation Report March 2001 & Final- February 22, 2002.
 - (4) The Revised Final Feasibility Study is scheduled for February 2004
- Treatment and/or Removal Areas: Soil treatment of approximately 24,000 cubic yards in five separate site locations within the 19.44 acre superfund site area contain elevated concentrations of the following metals: arsenic, copper, lead, cadmium, and chromium. The treatment areas also include the contaminant pentachlorophenol (PCP).
- Surface water from the site flows into Nimrod Lake
- The Town of Plainview has received a Federal Pilot Grant for Superfund Site Redevelopment. The Town of Plainview has develop a prioritized Land Use Development Plan for the site so that a remedy can be selected which is appropriate for the future use.
- The Town of Plainview has received commitment from EDA and ADE for reuse and development of 8.58 acres of property within the 95 acre tract of an uncontaminated area, and north of the contaminated area of the site. The end users have secured their share of

the financing for the city/users to proceed with the reuse and development activities.

- The Town of Plainview has received Grant Funding from EDA and ADE for the reuse and development of the uncontaminated 8.58 acres.
- Proposed Fencing and Site Map was prepared by the EPA Contractor, CH2M HILL
- The proposed plan is being prepared and a City meeting is tentatively scheduled for February, 2004, to discuss the EPA Proposed Alternative Plan for site remediation.
